Lexaria Bioscience Arranges Private Placement Financing to Fund New Laboratory

Kelowna, British Columbia – October 16, 2018 – Lexaria Bioscience Corp. (OTCQX: LXR) (CSE: LXX) (the “Company” or “Lexaria”), a drug delivery platform innovator, announces it has arranged a non-brokered private placement for gross proceeds of approximately US\$1 million.

The financing is comprised of Units priced at US\$1.60 each. Each Unit shall consist of one common share of the Company (a “Share”) and one Share purchase warrant (each Share purchase warrant, a “Warrant”). Each Warrant shall entitle the holder to acquire one common share at a price of US\$2.25 per Share for a period of 24 months following the closing of the financing.

The net proceeds of the financing will be used to fund construction and development of the Company’s new Canadian-based laboratory; to accelerate Lexaria-developed R&D; and for general corporate purposes.

Lexaria has received building permits to begin renovations required for a new, larger head office located in Kelowna, Canada. This includes the construction of a new laboratory that, after submission to Health Canada for an R&D license and subsequent expected approval in 2019, will become Lexaria’s new headquarters for global R&D across all molecule classes including restricted substances and non-restricted substances that are still strategic in value.

The Lexaria laboratory will contain certain equipment allowing for more advanced processes and greatly reduced R&D throughput times compared to Lexaria’s current facilities. This will assist the Company in maintaining and increasing its leadership position related to intellectual property.

The financing is subject to certain conditions including, but not limited to, the receipt of all necessary approvals, including the approval of the Canadian Securities Exchange and the applicable securities regulatory authorities. All securities issued will be subject to applicable hold periods in accordance with Canadian securities laws and will be “restricted securities” as defined under the securities law of the United States.

This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the securities in any State in which such offer, solicitation or sale would be unlawful. The securities being offered have not been, nor will they be, registered under the United States *Securities Act of 1933*, as amended, and may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements of the United States *Securities Act of 1933*, as amended, and applicable state securities laws.

About Lexaria

Lexaria Bioscience Corp. has developed and out-licenses its disruptive delivery technology that promotes healthier ingestion methods, lower overall dosing and higher effectiveness of lipophilic active molecules. Lexaria has eight patents granted in the USA and in Australia and has filed over 50 patent applications worldwide across ten patent families. Lexaria’s technology provides increases in intestinal absorption rates; more rapid delivery to the bloodstream; and important taste-masking benefits, for orally administered bioactive molecules including cannabinoids, vitamins, non-steroidal anti-inflammatory drugs (NSAIDs), nicotine and other molecules. www.lexariabioscience.com

FORWARD-LOOKING STATEMENTS

This release includes forward-looking statements. Statements which are not historical facts are forward-looking statements. The Company makes forward-looking public statements concerning its expected future financial position, results of operations, cash flows, financing plans, business strategy, products and services, competitive positions, growth opportunities, plans and objectives of management for future operations, including statements that include words such as "anticipate," "if," "believe," "plan," "estimate," "expect," "intend," "may," "could," "should," "will," and other similar expressions are forward-looking statements, including but not limited to: that any additional stock warrants or stock options will be exercised. Such forward-looking statements are estimates reflecting the Company's best judgment based upon current information and involve a number of risks and uncertainties, and there can be no assurance that other factors will not affect the accuracy of such forward-looking statements. Factors which could cause actual results to differ materially from those estimated by the Company include, but are not limited to, government regulation, managing and maintaining growth, the effect of adverse publicity, litigation, competition, the patent application and approval process and other factors which may be identified from time to time in the Company's public announcements and filings. There is no assurance that existing capital is sufficient for the Company's needs or that it will be able to raise additional capital. There is no assurance that Lexaria will successfully complete any other contemplated or existing technology license agreements; or that results from any studies will be favorable or in any way support future business activities of any kind. Scientific R&D is often unpredictable and unanticipated results could emerge from any study and have a material impact as can any results that cannot be reproduced in subsequent testing. There is no assurance that any planned corporate activity, scientific study, R&D, business venture, or initiative will be pursued, or if pursued, will be successful. There is no assurance that any of Lexaria's postulated uses, benefits, or advantages for the patented and patent-pending technology will in fact be realized in any manner or in any part. No statement herein has been evaluated by the Food and Drug Administration (FDA). TurboCBD™, DehydraTECH™ technology and ViPova™ products are not intended to diagnose, treat, cure or prevent any disease.

Lexaria Bioscience Receives Two New Granted Patents

Kelowna, British Columbia – October 18, 2018 – Lexaria Bioscience Corp. (OTCQX: LXRP) (CSE: LXX) (the “Company” or “Lexaria”), a drug delivery platform innovator, announces it has been granted two new US patents.

Lexaria now has six granted patents in the US and four granted patents in Australia. All ten of these patents are within Lexaria’s first patent family, “Food and Beverage Compositions Infused With Lipophilic Active Agents and Methods of Use Thereof”. Specifically, the two new patents are related to certain cannabinoid infused beverage compositions utilizing Lexaria’s proprietary DehydraTECH™ process which continue to strengthen the Company’s dominant intellectual property in the important cannabis beverage market.

Newly granted patent numbers 10,103,225 and 10,084,044 provide protection for compositions as well as methods for making the compositions, each of which include the use of both non-psychoactive cannabinoids such as CBD and also psychoactive cannabinoids such as THC. Lexaria is currently pursuing accelerated examination for patent applications in Australia based on these newest US patents and hopes to receive two corresponding Australian patents granted by the end of 2018.

With over 50 patent applications filed worldwide across an increasingly diverse range of patent families, Lexaria continues to expand its patent portfolio as a result of positive developments from its many research projects and is currently preparing additional new applications.

About Lexaria

Lexaria Bioscience Corp. has developed and out-licenses its disruptive delivery technology that promotes healthier ingestion methods, lower overall dosing and higher effectiveness of lipophilic active molecules. Lexaria has multiple patents pending in over 40 countries around the world and has patents granted in the USA and in Australia for utilization of its DehydraTECH™ delivery technology. Lexaria’s technology provides increases in intestinal absorption rates; more rapid delivery to the bloodstream; and important taste-masking benefits, for orally administered bioactive molecules including cannabinoids, vitamins, non-steroidal anti-inflammatory drugs (NSAIDs), nicotine and other molecules. www.lexariabioscience.com
