### **Record-High Oil Production During Month of June**

**Vancouver, BC—Lexaria Corp** (LXR-OTCQB) (LXX-CNSX) (the "Company" or "Lexaria") is pleased to report the Belmont Lake Oil Field achieved record-high oil production during the month of June that was a material increase from any previous month.

For the month of June 2012, the four oil wells at Belmont Lake together produced 8,755 barrels of oil, for an average of 282.5 barrels per day. Lexaria has current average production in excess of 105 b/d, net to the Company.

During the calendar year 2011, Belmont Lake field produced an average of 3,111 barrels of oil per month which itself was the highest annual production ever. Subsequent to two well workovers completed ~May 21, 2012, Belmont Lake has been producing at new higher rates.

All production figures are unaudited, subject to revision and provided by the Operator, and normal production declines should be expected. Lexaria has a 42% WI in wells 12-1 and 12-3 and a 50% WI in wells 12-3 and 12-4.

#### **About Lexaria**

Lexaria's shares are quoted in the USA with symbol LXR and in Canada with symbol LXX. The company searches for projects that could provide potential above-market returns.

## **FORWARD-LOOKING STATEMENTS**

This release includes forward-looking statements. Statements which are not historical facts are forward-looking statements. The Company makes forward-looking public statements concerning its expected future financial position, results of operations, cash flows, financing plans, business strategy, products and services, competitive positions, growth opportunities, plans and objectives of management for future operations, including statements that include words such as "anticipate," "if," "believe," "plan," "estimate," "expect," "intend," "may," "could," "should," "will," and other similar expressions are forward-looking statements. Such forward-looking statements are estimates reflecting the Company's best judgment based upon current information and involve a number of risks and uncertainties, and there can be no assurance that other factors will not affect the accuracy of such forward-looking statements. It is impossible to identify all such factors but they include and are not limited to the existence of underground deposits of commercial quantities of oil and gas; cessation or delays in exploration because of mechanical, weather, operating, financial or other problems; capital expenditures that are higher than anticipated; or exploration opportunities being fewer than currently anticipated. There can be no assurance that road or site conditions will be favorable for field work; no assurance that well treatments or workovers will have any effect on oil or gas production; no assurance that oil field interconnections will have any measurable impact on oil or gas production or on field operations, and no assurance that any expected new well(s) will be drilled or have any impact on the Company. There can be no assurance that expected oil and gas production will actually materialize; and thus no assurance that expected revenue will actually occur. There is no assurance the Company will have sufficient funds to drill additional wells, or to complete acquisitions or other business transactions. Such forward looking statements also include estimated cash flows, revenue and current and/or future rates of production of oil and natural gas, which can and will fluctuate for a variety of reasons; oil and gas reserve quantities produced by third parties; and intentions to participate in future exploration drilling. Adverse weather conditions including but not limited to surface flooding can delay operations, impact production, and cause reductions in revenue. The Company may not have sufficient expertise to thoroughly exploit its oil and gas properties. The Company may not have sufficient funding to thoroughly explore, drill or develop its properties. Access to capital, or lack thereof, is a major risk and there is no assurance that the Company will be able to raise required working capital. Current oil and gas production rates may not be sustainable and targeted production rates may not occur. Factors which could cause actual results to differ materially from those estimated by the Company include, but are not limited to, government regulation, managing and maintaining growth, the effect of adverse publicity, litigation, competition and other factors which may be identified from time to time in the Company's public announcements and filings.

*The CNSX has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.*
